CS-3 SUPPRESSOR

Caliber: .300 Blackout

3D printed monolithic design using a nickel based Super Alloy Haynes 282, the CS-3 is one of the most durable suppressors on the market to date. The CS-3 is capable of sustained full-automatic fire while providing operators with sound, thermal, and flash mitigation. A semi-auto rated version is also available in Ti6Al4V.

The CS-3 utilizes a forward venting monolithic design controlling cyclic rate while the assist ports reduce back pressure. The CS-3 is protected by a high-temp Cerakote coating, providing protection and a higher level of concealability. Alphatek Alphashield IR Reflective coating available
