

GPS-5K

5.56

Engineered with Kinematics in mind, the GPS5K is a suppressor designed for high stress combat environments.

GPS5K utilizes Breathable Technology to gain its extremely low back pressure to greatly decrease toxic blowback exposure to the operator and reduce wear and tear on the host weapon.

Manufactured using Haynes 282, an extremely durable, high heat resistant alloy, GPS5K is just as at home on a belt fed machine gun as it is on a carbine.

PRODUCT DETAILS

SKU: GPS-5k

CALIBER: 5.56MM

MATERIAL: HAYNES 282

COATING: ALPHATEK ALPHA SHEILD IR

ATTACHEMENT METHOD: TAPER LOCK TO KFM

LENGTH: 6.00"

DIAMETER: 1.75 in max OD (4.45cm)

WEIGHT: 19.16 oz

SIGNATURE REDUCTION:

FLASH,SOUND,GROUND DISTURBANCE,THERMAL.
