CS5 MOD1 SUPPRESSOR

The CS5 MOD1 is a next-generation, compact suppressor engineered for peak performance with minimal footprint. Designed with a focus on low backpressure, it reduces the load on the operator while providing superior signature reduction. It's streamlined profile improves muzzle balance and feel without compromising weapon kinematics, all while featuring a rugged quick-disconnect system for rapid deployment.

Features:

- **Optimized Control:** Rear biased CG improves muzzle balance; forward-venting design significantly reduces back pressure.
- **Dual-Locking Ratchet:** Replaces the HUB mount for a shorter OAL and sub MOA POI shift repeatability.
- **Signature Reduction:** Optimized flash and sound suppression with integrated BOP mitigation.
- **Interface:** Dual-Locking Ratcheting QD with recessed teeth to prevent fouling, wear, or impact damage.
- **Rating 138.74dB** at 'Shooter's Ear' on an 11.5" 5.56 Carbine

TAPER-LOCK WITH SECONDARY LOCKING FLASH HIDER
